Jairam Public School is awarded with the prestigious
BRITISH COUNCIL INTERNATIONAL SCHOOL AWARD

Chairman's Message

With the blessings of the Almighty and of all well wishers,
I strive to make this campus **A SCHOOL** with a **DIFFERENCE**

Thiru. J. Rajendra Prasad, a man of success with inclusive thoughts is the founder-chairman of Jairam Public School Salem. He is renowned for thinking ahead of time and for his progressive plans that are unique and valuable. He is well-known for his effective management and spirit of promoting excellence in education and has dedicated himself completely for promoting quality education and to sprinkle knowledge and discipline amongst the youth.

He is a leading educationalist and philanthropist and he serves as the correspondent and Secretary of Vysya College established in the year 1990 which is affiliated to Periyar University, Salem. This is the first college to be accredited with Prestigious "A" grade Status by National Assessment and Accreditation Committee (NAAC), Bangalore.

With this valuable experience and in fond remembrance of his father Thiru. Jairam Chettiar he constructed the HI-Tech Institution JAIRAM COLLEGE in the year 2001.

This multi-faceted personality with his 25 years of experience in the field of higher education has stepped into another milestone JAIRAM PUBLIC SCHOOL for Kids. A School with all Hi-Tech facilities, safe, secure & comfortable infrastructure with modern teaching methodologies. It ensures the child's intellectual, emotional, physical and spiritual development and aims to produce successful, responsible, creative, global citizens with the best moral values.

“**EDUCATION** is all about the
pursuit of excellence
in every aspect of **LIFE**”

Principal's Message

We, the Jairam Public School aims to create a sufficient and inclusive environment where gifted and talented students are encouraged to explore their potential and achieve their personal best in all aspects of school Life.

We are sincerely committed to educate and bring up an emerging generation who possess a global perspective and will be positive contributors to the community as a whole.

Jairam Public School is a wonderful place for Pupils from diverse backgrounds to grow educationally, get involved, and have eloquent school experience.

Students will be challenged and engaged through authentic Learning opportunities that inspire them to enhance creativity, confidence and resilience to become independent and ethical life-long learners.

Our school offers a broad curriculum and a range of opportunities for all our students to achieve excellence in academics creative, social, cultural sporting and community endeavours. We value collaborative learning, positive relationships and building capacity amongst our students to effectively allow them to engage in the world of the future, where problem solving, evaluating, working in teams, communicating, creating and innovating are not only valued concepts, but expected skills, attributes and capabilities.

All of this is made possible by strong partnerships that are developed especially with our parents who whole heartedly support us in all our endeavors for the holistic enhancement of their child at school.

As part of the CBSE affiliated school, we have a distinctive advantages of methods made available to us.

So come on in! Take a look at what advantages your child will have being in a well reputed school like ours.

the **future** is here

Our Vision

Our Vision is to instigate Indian Values among students by providing a happy, caring and thought-provoking environment to make children recognize and achieve their fullest potential, so that they can make their best contribution to the society.

To create a respectful environment for students and to build "Culture of Achievement". To Provide a personalized and student-centered approach to learning and focus on continuous improvement and shared accountabilities. To ensure that all students have the widest range of opportunities beyond the classroom and that each student can develop both generally and in areas of specific personal talent.

Our Mission

Objective

To make students academically competent by evolving creative teaching methods that will Kindle their curiosity and inspire them to become life-long learners. Providing relevant information at all levels with the use audio-visual and other sensorial aids. Providing a solid foundation and ensuring that concepts are so well understood by the students that they could be applied intelligently to other situations. To instill in our students, self-confidence, courage and ability to face problems and challenge in life. To create in the students, social awareness and a sense of belongingness by encouraging them to assume leadership and contribute towards uplifting local and world communities. To inculcate in the students a deep-rooted respect for the environment and of their responsibility to preserve it.

WELCOME TO THE SECOND HOME OF YOUR CHILD

We at JPS believe in celebrating childhood with the same intensity and love as you do for your child. A Second home of your child, where she/he learns the external world through our own teaching methodology. We discovered this methodology after intense research based on children's response to their environment.

4Cs

CURIOSITY | CONFIDENCE | CONTINUITY | CREATIVITY

THIRTEEN LEARNING LADDER INSPIRES THE 4CS IN A CHILD :

Inquiry : Inquiry describes the child's thirst for knowledge and information. Children inquest everything in their surroundings due to their basic characteristic of being 'curious'.

Interaction: Exposure to multifaceted teaching & learning aids enhances the experiential learning and nurtures holistic enhancement of children. Interaction is the best mode of fulfilling inquisition which provides confidence to a child with appropriate knowledge and information.

Innovation : Innovation is an expression of creativity. It's boundless and not limited to measurability. Each creative expression is a new benchmark on the child's developmental continuum.

This methodology is very much effective in inspiring Curiosity, Confidence, Creative and Continuity in a child to instill a habit of self-discovery right from the beginning.

improving
tomorrow by
learning today

Differentiating Instruction Strategy

A Focus on instruction to overcome behavioral and intellectual limitations. Parents pressed for teachers to capitalize on student strength in their instructional approach to raise the bar of expectation. Teachers were asked to refocus on what children can do and how they learn best, rather than the prior emphasis on primarily what children can't do. The challenges for teachers is to stop focusing on the weakness of the children and instead to teach the children in order to enrich their talents and skills. Teaching goal and approaches have to be matched to what children were ready to learn and how they learn best. Differentiating instruction strategy practices are tailored towards individual learning need.

The concept of differentiating instruction is based on the need for diverse general education. Teachers have to differentiate instruction to meet the needs of the diverse learners in the general education class.

There are three areas,

- ▶ Content (what is learner)
- ▶ Process (how the content is taught)
- ▶ Product (how the learning is observed and evaluated)
- ▶ The learning content involves what students are to master and what we want the students to accomplish after instruction.

The learning process involves how the student interacts with the content, and those learning interactions will in part determine the various learning preferences of the students because of the diversity of learning style and preference demonstrated by the student today. The differentiated class will typically involve wide array of activities to address the different learning needs of everyone. This learning process may include some of the following.

- ▶ Activating the learning - the introductory activities focus on the material to be learned. Relating that material to previously mastered material let the student know why the material is essential and describes what the students should be able to do once they learn.
- ▶ Learning activities - involve the actual instructional activity for the students such as modeling, rehearsal, choral chanting, movement associated with the content.
- ▶ Grouping activities - both individual and group oriented learning activities should be planned as part of learning process.
- ▶ Finally, the learning product will be of paramount importance because demonstrations of learning allow the teacher to determine the students who have mastered the material.

LANGUAGE DEVELOPMENT

It is essential that children understand communication not only just through verbal communication, but also by using non verbal and visual communication.

COGNITIVE DEVELOPMENT

It is crucial that a child's learning, understanding, problem solving, reasoning and memory skills are enhanced through various activities.

FINE MOTOR DEVELOPMENT

At a very early age, the child should be able to use his or her hands not only to eat and dress, but also to draw, play, write, be creative, inventive in the process and develop aesthetic skills.

GROSS MOTOR DEVELOPMENT

Gross motor skills help in developing simple skills like how to sit, stand, walk and run, keep balance and change position.

PERSONAL AWARENESS

Habits are formed at this stage and it is imperative that children learn not only about themselves but also develop independence, safety and hygiene.

SOCIO-EMOTIONAL DEVELOPMENT

It is very important that children learn to build positive relationship with their family, friends and teachers.

Skill - Based Learning

TALENT DEVELOPMENT

It is essential to help the children identify their ability early in life so that their full potential can be realized. It is a gradual process from Kindergarten to middle school. We encourage children to be creative and provide an environment where they can express themselves and feel inspired from within.

We identify every student's specific strengths and focus our attention on the development of those. Talents are divided in four major domains:

ACADEMIC OR INTELLECTUAL ABILITIES:

Development of language skills such as poetry writing, creative writing, story telling, mathematical abilities, scientific abilities-robotics, inventions and projects, etc.

CREATIVE ABILITIES:

Developing artistic skills like dance, music - instrumental or vocal (Western or classical), drama, photography, drawing / painting, sculpture, etc.

PHYSICAL ABILITIES :

Sports such as athletics, field games, judo, karate, skating, chess, taekwondo and etc.

SOCIAL ABILITIES:

Focus on the abilities which children use in their daily interactions with classmates, teachers and parents, enhancement of other qualities such as leadership, problem solving abilities, interpersonal communication, handling peer pressure, etc.

All stakeholders in the school - teachers, parents and students themselves - play an important role in identifying and channelizing the talent of the child in the right direction.

TEACHER EMPOWERMENT

Teachers at Jairam Public School are learners too. They believe in continuous growth and innovation for better teaching practices. Our Teacher Empowerment Program equips teachers with the best pedagogical strategies which facilitate learning in the classroom. Apart from their academic qualifications, one quality that all our teachers possess is a passion for our children.

FEATURES
